

Morro Edible Film.

Made just from plants, Morro® Edible Film is a fully biodegradable replacement to polluting plastic films. Morro Edible Film is also vegan and gluten free; suitable as a wrapper for a range of food products or as innovative 'cook-in' packaging, meaning consumers benefit from an entirely new experience: packaging you can actually eat. Morro Edible Film is heat sealable and compatible with existing flow-wrapping equipment. This has already been brought to market with leading recipe kit company, Gousto, with the launch of the world's first edible stock cube wrapper.

Our material is:

- ✓ Plant-based
- ✓ Vegan and gluten-free
- ✓ 100% plastic free
- ✓ Biodegradable and home compostable
- ✓ Edible, cookable, dissolvable & digestible

We all want to live without harming the planet. Morro makes it simple. Plastic free materials that are strong, natural and fully biodegradable that eliminate the most polluting plastics for a better tomorrow. A high-performing, drop-in solution that puts the power to do good in everyone's hands.

Choose the Planet.
