

Analytical Technician

The Role

The company is seeking an Analytical Technician to join the team, with the role of:

- supporting the Senior Analytical Chemist in the performance of routine analysis of nutrients and fragrances in products by high-performance liquid chromatography (HPLC) and gas chromatography (GC).

Candidate Experience

The company is seeking candidates with:

- Essential Experience:
 - Experience working in an R&D or Manufacturing Laboratory setting conducting a variety of physical and chemical analysis.
 - Knowledge of Gas Chromatography and High-Performance Liquid Chromatography.
 - General Laboratory good practices and upkeep.
- A bachelor's degree in a discipline relating to Biology, Chemistry, Food science or Material science (or equivalent in skills and experience).
- Desired Experience:
 - Experience operating HPLC and GC equipment in an R&D or Manufacturing Laboratory setting.
 - Experience operating a range of measurement equipment such as light microscopes, particle size analysers, viscosity meters.
 - Preparation of lab scale samples for formulation testing.
 - Running shelf-life stability studies.
 - Following Standard Operating Procedures.
- An enthusiasm for Xampla's mission of addressing plastic pollution, and an interest in sustainability
- The right fit for a small, science-led, innovative team and a high level of autonomy, creativity and independence.
- An individual with a can-do attitude who thrives in a fast-paced environment.
